We believe it is governally understood by the voters of Kentucky, that the present efficient increase over 1853: President of the Board of Internal Improvement, Dr. David R. Haggard, of Cumberland county, is a candidate for re-election. Several other gentiemen have been mentioned in this connection any one of whom would, doubtless, make a good officer. But it is scarcely advisable to remove an officer who has shown himself faithful and capable, in order to make room for any one, no matter how clever or talented, individually.

At no time has our complicated system of Internal Improvement been in so prosperous a condition as now. This is mainly attributable to the personal supervision that Dr. Haggard gives the various public works. In fact, never, before his taking the Presidency, did the improvements pay expenses. He went into office in 1951, and for the three preceeding years, the expenses on tho Green and Barren river line of navigation, execoded the revenue \$15,053 1L, and since the Doctor has had control of that line the following is the result, to-wit:

The Homicide Case. We furnish in our report of the proceedings o the Police Court a somewhat detailed account of the testimony as introduced upon the examination of James D. Girard for killing Darwin Brooks. The facts do not coincide in every particular, and there were some confused statements made by witnesses, attributable, however, in s great meaure, to the chatechising of the attorneys.

Bail was required of the accused in \$1,500 to ap ear February 19, before the Jefferson Criminal Court. Girard, through his friends, made several efforts L obtain the requisite security, and thought that by this morning he could meet the requirements of the court.

We were glad that Judge Johnson, in renderng his decision, attributed the homicide in a great measure to the unpardonable conduct of Green, Brooks and Elliot, who were all drunk and disorderly Sunday evening. The fatal tragedy was likewise the result of a violation of one of the statutes prohibiting the carrying of concealed Had not Girard, at the time, been violating the law, he would not have taken the life of Brooks.

We find in the Commercial of yesterday (Jan. 25) the proceedings of a second meeting of the liquor dealers of Cincinnati. An agre ement was drawn up, binding the signers to pay the various sums affixed to their names, for the purpose o raising a fund to sustain the association in taking such legal steps as they may deem advicery in resisting the law. About three thousand dollars were subscribed for this purpose, and a committee of three was appointed to circulate the subscription list for signatures among the landlords

throughout the city. It was unanimously agreed that any one could become a member of the association by paying into the treasury the sum of five dollars; but i arrested for violating the law, in order to secure to themselves the benefit of mutual protection, they must pay an additional sum of forty-five

A motion prevailed, without a dissenting voice, This deed of blood is but another addition to that in future the local law prohibiting the sale on the premises on that day.

Its inventor, theoree W. Beardslee, Esq., of this city, kindly furnished us with a ream to print for chrenkation among these directly interested in the important descovery.

The paper is made rom pulp produced from basewood shary ugs, of a peculiar form, thrown oil by Mr. Beardslee's planing-machine, which has been improved to produce this result. It contains no mixture of rags, or other material whatever, nor sixing. It is from the pure wood alone. The paper furnished us was made at Satterlee's mill. Little Falls, under nefavorable chromastances. The supply of pulp was so small that the mill had to be served by hand instead of by grage-pumps, the consequence of which was such irregular feeding as to produce slightly irregular thickness of paper. The paper has also been used, with perfect success, by Mr. Best, for transferring due line engravings—a result which cannot be attained by any other ordinary newsper.

of paper equal to the weight of the pulp used. Consequently, in adopting it, no new machinery will be required, but a great deal of the most cumbersome now used, and much of the most ampleasant part of the work of making paper from rags, may be dispensed with.

This discovery, as timely as it is important, will prove of incalculable value to the world. The necessity of some such substitute for the articles hitherto used in the manufacture of punch, had become importance. The demand had already out. ibi, with these crude specimens of basswood

Something to Drink.

The exertions of the Mayor to prohibit the sale of liquor on Sanday, seemed more successful yest rize, than on the two previous Sandays. The closing of the bars of the principal hotels to the public, was very generally followed by honses of his pretension. Still, liquor was sold, and the "knowing ones" the "striped pig" sort were enacted. At a "hotel" la Lispenard street, lodgings for the night could be had for twasty-five cents, and a ticket receipt given on the payment of the cash. Those who thus became guests of the honse, could, of course, for the regular charge, he supplied with wine or such other liquor as saited their fancy or taste, without a violation of the law. The hotel did an unusually large business in the "lodging" line, and judging from the

number of names registered on the book, every room must have been occupied by more than one guest.

Some of the saloons did the fair thing without any equivocation. On the sign of one, in the vicinity of Barman's Moseum, the thinsty, and all others interested, were informed that there would be "no communication with the spirits." A perty of three persons reported that, during the day, they had traveled from Union Square to Park Row, in search of something to drink, but were unable to find any.

We are not aware that the editors in this vielnity have ever colleged this privilege. At the North it is called the "dead-head system." But perhaps no better opportunity will offer for the remark that the conductors of the public press have not abused the privilege it accorded to them. WEEKLY COUIRER

SATURDAY, FEBRUARY 3, 1855.

We are enjoying-that is the proper wordhe first genuine wintry weather that has been suchsafed to us the present season. We have the weather grows colder, and the suffering of the now and ice and cold wind. The first affords tolerably respectable sleighing, the second a semiguarantee against the heats of the coming summer, while the last infuses health, braces the nerves, paints the cheeks, and causes home and the fire-side to wear the most beguiling appear-

It was Saturday "in the glooming," as the poet, Lowell, hath it, that the snow began. Very busily during the night did it flutter down, so that the Sabbath came to us arrayed even in a purer robe than is the wont of that most blessed day. Everything was white-the roofs of the houses and the steeples of the churches the filth of the streets lay shrouded in the unpolluted mantle, and the patches of green grass in private yards nestled beneath the warm covering of the snow. Everybody was glad, though everybody shivered. It was only an extra lump of coal on the fire that was required by those in doors; and a little closer buttoning of the great coat, and a more careful muffling of the ears, needed for those who ventured out.

By mid-day fast young men were to be seen on every street, perched in boxes or baskets upon for the track of the Nashville road. The last runners, and driving smoking teams at furious gaits. Bells, real sleigh-bells, jingled merrily in striking contrast with the muffled tones that rang out from the church tops. Wheeled vehicles were voted a bore. Livery-stable keepers charged tremendous prices, and many a rapid youth disselved his week's wages into a couple of

But the night was the royal time. Never a bit did the moon shine, though advertised so to do by the Almanac, nor did the stars look at all lustrous. The air, however, was clear-the snow crispy—the aleighing glorious. There was physical delight in each-romance in all. Sunday as it was, and cry aloud as did the churchbells, with expostulatory vehemence, against the seeming profanation, sleighs would halt before fashionable residences, and having received an accession to the load, in the shape of a be-cloaked and be-furred, though scarcely bonneted lady, drive on the gay round of pleasurable dissipa-

For the man who would steal chickens, whether through sheer necessity to satisfy his hunger, or in order to acquire their value in money, the honest world must entertain the most unmitigated contempt. Boys at colleges are excusable when hey make predatory excursions upon hen-roosts, since either the miserable fare at their boarding houses, or the irrepressible desire for excitement drives them to the commission of this petty lar sency. A man should always be manly, even in crime, and if he violates the law let him risk serious consequences. Some bad men, however, have neither the mind to plan, nor the courage to achieve great exploits in thieven. Some, indeed, will prowl about chicken coops, and having bagged a dozen or so, will, upon the slightest indication of danger, leave the stolen property and flee for safety. Such a fellow is the pitiful scamp, who last Friday night visited the premises of Mr. Wm. McCoy, on Green street, between Twelfth and Thirteenth, where, when he was making de predations, he heard an alarm, took to his heels,

ropped his sack and has not since been heard of. This we call chicken-hearted, supremely contemptible, the rogue deserving to be buried alive in a dunghill, crowed over by chanticleer and then scratched up in the early spring by some neat, and clean, and Messra. B. & J. T. i uckett, amal han Mr McCov rotain chickens, bag and all. Whoever will claim and prove the property can obtain it by calling.

Shakepeare a Humbug.

This is an age of infidelity. Our belief in everything is being shaken. There is no such thing as a plurality of worlds, argue some people, an with great force. We are not all the descendants of Adam and Eve, others stoutly contend. Wash ingtor was not a good man, say many heretics who acknowledge his greatness. And so on through endless chapters of incredulity in old time-honored beliefs.

The latest assumption concerns the Bard of Avon-the almost divine Shakepeare. A lady one Miss Bacon, has taken upon herself a mission to prove to the world that Shakspeare was a myth. a man of straw, whose name was used to father the dramatic productions of men of eminent abilities in other departments of literature, in law and in statesmanship. Miss Racon assumes, as we learn from the New York Courier and Enquirer that it was impossible, absolutely and utterly impossible, for a man with the limited advantages of Shakspeare's early life, to write thirty-sever plays, exhibiting the marvellous knowledge of me and things, which the plays attributed to him do exhibit. Such a series of performances, she urges, by such a man, would be a series of miracles; and them, he would have become one of the most prominent men of his day, and we should have known all about him, instead of having to grope and bur row for a very few personal traits and anecdotes of his life, as we have had to do with regard to

Miss Bacon's theory is, that Shakspeare was a dramatic Joe Miller; a good-natured, inoffensive person, who would consent to bear the responsi ility of the works attributed to him, and not pre sume upon the fictitious reputation which they brought him. Shakspeare's plays, according to Miss Bacon, were written by Lord Bacon, Sir Walter Raleigh, and one or two others, but chiefly by the former; and alse has spent a great deal of time in frami g a very ingenious and elaborate argument in support of her theory. A Banker Hang in Effizy-Excitement at Ver-

The branch of the Commercial Bank of Kentucky, located at Versailles, Woodford county, has been for acveral months past greatly embarrassed by the constant and heavy drafts of specie made by Mr. Barclay, a Lexington banker, upon its vaulta. It was a custom with that gontleman to collect all the notes payable at the Versailles branch, and present them at the counter for redemption. This drain upon the bullion of the bank required very skillful financiering on the consequence it was impossible for the institution | 15. to afford merchants, farmers and tradesmen, the desired discounts and other monetary facilities. Thinking that this draw-game had been played ufficiently, the citizens of Versuilles met to gether on Saturday, passed resolutions denounce ing the conduct of Barclav, and then proceeded

to hang him in effigy. The indignant people also promised to make summary work with Barclay, or his clerk, if either ever again molested the vault of their bank. We p.esume that Mr. B. will henceforth desist trading in Commercial Bank paper.

The most unpleasant, and that which pro be the most disastrous result, from the intense legree of cold now being felt, is the advance made n the prices of the different necessaries of life. Cool has already goue up two cents per bushel nolders yesterday demanding sixteen cents. As poor become severer, the coal dealers will still farther increase the price of fuel.

Corn, hay, oats and similar articles have a apward tendency, consequent upon the threatened suspension of navigation.

But perhaps the wost serious evil growing ou of the late freeze is the appreciation upon the hen-fruit market. Eggs are eggs in reality now, and a dozen cannot be had for less than twenty cents. On Saturday a weather-wise speculato ught up all the eggs in the market at fifteen cents per dozen, and is now selling them at weuty cents quite a profitable investment, a

The committee on Naval affairs of the Sens have matured a very excellent bill for the establishment of what has been called the retired lis of officers. The bill is so framed as to render re rement from actual service acceptable, and in o way derogatory to an officer. The service is be divided into two lists—the active and the ro served list. Those placed on the reserve list are able to be re-called into the service, but in the rank in which they retire. The Harmonions Democracy. The most remarkable feature which character ised the recent election, by the Massachusetta House of Representatives, of the Hon. Henry Wilson as U. S. Gentlemen: At the late election of directors for the Fort Nague and Southern Bailroad Company, the stockhol ers clee ed me a director. I determined, before accepting, to endeaver to ascertal something of the prospects and condition of the company, and with that view I attended a meeting of the Board to-day. I found that the work had not been supenced and that? I is progressing as apily as could be desired on the northern aud southern divisions of the line. The southern divisionextends from Jeff Isonville to North Vennen, where it intersects the Ohio and Mississippi road. The northern

d fron. Four-fifths, and perhaps more, of the grading and mbbing have been completed on the uorthern dision, and I believe it is anticipated that the whole that kind of work on the southern division wi completed early in the approaching summer, pro-led the company can keep its present forces en-oyed. I is understood that the road is to be of e "six-foot gange," thus enabling the company to ruu through trains in counection with the Ohio an Mississippi road from Louisville to Cincinnati. Th mississippi road from Louisville to Cincinnati. The copile of Rush can indge as well as I can of the importance of the road and its probable profits to lockholders. It starts at Fort Wayne and passes brough the county seats of Wells, Delaware, lenry, Rosh, Decadur, Jennings, Scott, &c., in early a direct line from the starting point to Louville, crossing the Bellefontaine, the Cleveland traight line, the Central the Lawrencephage and

tion of the line under contract from North Ver

portion of the line ander contract from North Veruon to the Central road.

I am aware that it is a difficult time to build railroads; but the farmers can see the benefits of such
improvements more clearly now, perhaps than at
any fremer period. They have the ability, if they
have the disposition, to said in the completion of this
long line of railway, with benefit to themselves and
to the country. I submit the whole question to their
consideration and determination.

I understand if the company can precure the iron,
that the two divisions of the road upon which the
company is at work, will be completed uring the
present year. I had not time, however, to gather
full information on all these subjects.

Now, I am going to state facts, which the edito nows they are facts. If, after these facts are made nown, the Democrats of Kentucky, "if there by," choose to submit to this dictator of the 1 co man, it is their business and not mine.

1. I state that the Democratic Central Committee was appointed by the Convention which nominated Gov. Powell, in 1851. That committee consisted of Judge John M. Hewitt, Col. Victor Bonco, Win. Tananc, James Shannon, Jeptha Dudley Dr. Jos. G. Roberts, and Jame P. Metca fc. It is no secollection, but it may not be correct, that the solution of the convention required them to resolution of the convention required them to de in Frankfort. But this is not material. any rate, they were all assidents of Frankfort any rate, they were appointed. My opinion is, also that the tenure of their other was until the election of 1851, and that after that they were function of 1850. But that is not material if it is not true, but very material if it is true. Let the Yooman province outperson the support of the contract of the contract of the contract of the true.

2. Col. V. Monroe was appointed a judge of the United States Court for the Territory of Washington, and W. W. Stapp was appointed by the survieurs of the committee (by what antho ity I know not) to fill the vacancy occasioned by his removal Afterwards Mr. Stapp, Mr. Tanner, and Dr. Robert removed to Louisville, and are new ultizens of you place. Mr. Metcalfe removed to Mason county, on now resides there. This left three out of fine the sommittee living in Frankfort, to-wit: Il watt Shannon, and Padicy. My arithmetic teaches may that three is a minority of seven.

that three is a minority of seven.

3. There never was any one appointed to fill the respective vacancies occasioned by the removal of these four persons.

4. There never has been a meeting of the committee, in which these four gentlemen, or any one other, were present, and to ynever either directly out of the committee of the commitment of the commitm w Yeoman for the convention, and never were co

alled upon the subject.

5. Judge Hewitt, as chairman of the committee and at their request, that is at the request o. Him toft, James Shaunou and J. Dudley, prepared an address to the Democracy of Keutneky, calling a con ad further and fully examined the question as had forther and fully examined the question as to their authority, he came to the conclusion that they and no authority to call a convention, and refused to let the call geforth with his name to it.

6. In this ditemma the Democrats, appointing de-let to from different counties of the State to meet in convention on the 6th of January, the editor of the Yeoman, and other dictators of the party, in great trepitation, for fear the Democracy would ei-ther make a half or nominate in January would ei-

Judge Hewitt never recognized it as by authority. He may not have forbidden it—perhaps did not—but he never sauctioned it Bat he centended that, as an honest man and as an honest partizan, he had no right to call the convention. It is quite an easy mater to repair and submit resolutions declaring that to reshall be a Southern Prefile Railroad, that we must have Cuba, that the rivers and harbors of the South must be improved by the general government, that there must be an air-law railroad from the city of Norfork, Va., to the meath of the Olio river, and that a hundred other things of equal magnitude and importance must be done—just as easy as it would be to resolve that the Missishiph shall turn and enapty itself into Lake Superier, that a great commercial city shall be built at Key West, and that lines of steamers shall be est edilished and run once a week from it to every part of the world.

By the way, speaking of a commercial city, reminds me that Major Nosh once established a great city, which he christened "Arrant," apon Grund Island, in the Nings a river, to which he invited, by a published proclamation, all the children of Israel, from every part of the world. partially covered by a rich lace scarf, one of the extravagant purchases of the previous day. She had positively refused to wear any rouge, urging that the excitement would give her sufficient color; and Hatty was less pertinacious than on the preceding day, for she discovered that La

Papilon and Aspasia did not seem to favor her in These two sisters began to realize that the ountry girl possessed, in an extraordinary degree, natural beauties, and they did not care that she should have the external advantages of art, lest, despite her humble position, she should prove a dangerous rival; for they had read in ovels of the latent power, even of country girls, when aided by personal loveliness.

If Lucy was less brilliant in appearance than nose by whom she was surrounded, her beauty made ample atonement in its calm and gentle ourity, for the loss of external adornments. Her complexion was of that delicate, pearly white, which no art can imitate or counterfeit; and her soft eye, shaded by a rich foliage of silky brown ashes, her rosy mouth, so persuasive in its feminine gentleness; her refined manner and retiring glance, all proclaimed her the aristocrat of naure, before whom the lordlings of fashion and the ladies of earthly courts must chrink abashed.

As she stood unobserved near a table, glaneing wer some rare prints, she was startled by a blusring !

'How do you do, Miss Grafton ?' She looked p. and to her surprise beheld Mr. Simpkins, who, feeling a good deal like a fish out of water, had been floundering round the room in search of omething or some one with whom he might hide his embarrassment. He had spoken in the most racious and surveillient manner, to Henrictta; ut she having found 'metal more attractive' in the persons of two briefless attorncys, deemed at the card of invitation was distinction enough for a dry-goods clerk; and so contented herself with bestowing upon him a distant bow. But the proud girl read his caning at a moment, and in the most distant way, cknowledged his bow. An intuitive idea of politee s taught her that it was right that she should aive, in a private house, the usual ceremonial of pecial presentation. The coxcomb of tape was othing daunted by his frigid reception. Had Miss Gralton been the possessor of millions, her ightest glance would have had power to strike error to his soul. That that simple girl, with no adantages of fortune or nature, to, even for a mo ent, arrest the attention of the far-traveled Keungton De Vere, is a p of and mystery? All this vas said in a light, railling tone, but to one as cell versed in the subterfuges and artifices of woman's nature, like Kensington of De Verc, it was asy to detect, beneath the surface of flippancy, the iger's rage.

'Yes, I'll present you,' and they moved in the rection of Lucy. Mirth had dried upon La Papilon's tongue, and an angry light shone from her clear blue eye, which so lately had melted with love.

As they approached, Lucy turned round an net them with a bland smile, but La Papilon' rufiled manner and excited tone, as she presente Mr. De Vere, quite killed her cheerfulness. L Papilon hastily left them, and with Capt. Fitzpat rick and several other humming-birds of .ashior stood almost within hearing. With a hawk-like eye, she noted every motion of De Vere's; now and again she had a sly, flattering word for those who were with her.

Meanwhile, Lucy forgot her usual reserve, an vas soon wrapt in the charms of a free conversa on with her accomplished companion. De Ver talked much and well; he spoke of the countries ac had visited, of the olden spots he had looke upon. Mussas Editors is danger of defeat. The friends of King, Anderson and Tolbert are much excited in avor of their repetitive favorities, and its feared there will be a split in the ranks of the party, and defeat as the result. Our present candidates are talented and worthy gentlemen. To avoid difficulty in the ranks of the American party, (1 look upon Whig and Democrat as superseled by "Sam,") I suggest to the convention that may assemble, to select a candidate, to put in nomination Col. Shelty Stone, of Wayne. He is a high-toned gentleman, of the right age, talented, and would give credit to the District in Cangress. For several years he served in the Senate and lower branch of the Legishtance of the State, with distinction. I am infarmed he is sound, fally so, in favor of the principles of the American Reform party. In a word, be is like Washington; is in favor of Americans ruling America, and is opposed to for favored. y. In a word, be is like washington is all layer of Americas, and is opposed to for-igners filling our missions abreed. His nomination would give great satisfaction. Democrats and Whizs of the old parties would unite upon him, and he District would be proud of having on the floor of Congress an "American" Representative.
